USSN: 10/006,922

AMENDMENTS

In the claims:

- A nucleic acid present in other than its natural environment, wherein said nucleic acid encodes a chromo- or fluorescent protein and is from a nonbioluminescent Cnidarian species.
- The nucleic acid according to Claim 1, wherein said non-(Original) 2. bioluminescent Cnidarian species is an Anthozoan species.
- The nucleic acid according to Claim 1, wherein said nucleic acid is (Original) 3. isolated.
- A nucleic acid present in other than its natural environment, wherein said nucleic acid encodes an Anthozoan chromo- or fluorescent protein and is from a non-Pennatulacean Anthozoan species.
- The nucleic acid according to Claim 4, wherein said nucleic acid is (Original) 5. isolated.
- A nucleic acid having a sequence of residues that is substantially the same as or identical to a nucleotide sequence of at least 10 residues in length of SEQ ID NOS:01, 03, 05, 07, 09, No:11, 13, 15, 17.
- The nucleic acid according to Claim 6, wherein said nucleic acid has a sequence similarity of at least about 60% with a sequence of at least (Currently Amended) 10 residues in length selected from the group of sequences consisting of SEQ ID NOS:01, 03, 05, 07, 09, No:11, 13, 15, 17.
- A nucleic acid present in other than its natural environment that (Original) encodes a chromo and/or fluorescent protein, wherein said protein is either: 8.

- (a) from a non-bioluminescent Chidarian species; or
- (b) from a non- Pennatulacean Anthozoan species.
- 9. (Original) The nucleic acid according to Claim 8, wherein said non-bioluminescent Cnidarian species is an Anthozoan species.
- 10. (Original) The nucleic acid according to Claim 9, wherein said nucleic acid is isolated.
- 11. (Currently Amended) The nucleic acid according to Claim 9, wherein said protein has an amino acid sequence of SEQ ID No: 12 selected from the group consisting of: SEQ ID NOS: 02; 04; 06; 08; 10; 12; 14; 16; and 18.
- 12. (Original) A nucleic acid that encodes a mutant protein of a chromo and/or fluorescent protein that is either:
- (a) from a non-bioluminescent Cnidarian species; or
- (b) from a non- Pennatulacean Anthozoan species.
- 13. (Original) The nucleic acid according to Claim 12, wherein said non-bioluminescent Cnidarian species is an Anthozoan species.
- 14. (Original) The nucleic acid according to Claim 12, wherein said mutant protein comprises at least one point mutation as compared to its wild type protein.
- 15. (Original) The nucleic acid according to Claim 12, wherein said mutant protein comprises at least one deletion mutation as compared to its wild type protein.
- 16. (Currently Amended)

 A fragment of the nucleic acid selected from the group consisting of:
- (a) a nucleic acid encoding a chromo- or fluorescent protein from a non-bioluminescent Cnidarian species;

USSN: 10/006,922

- (b) a nucleic acid encoding an Anthozoan chromo- or fluorescent protein from a non-Pennatulacean Anthozoan species;
- (c) a nucleic acid having a sequence of residues that is substantially the same as or identical to a nucleotide sequence of at least 10 residues in length of SEQ ID NOS:01, 03,-05,-07, 09, No:11, 13, 15, 17; and
- (d) a nucleic acid that encodes a mutant protein of an Anthozoan chromo and/or fluorescent protein that is either:
 - (i) from a non-bioluminescent Cnidarian species; or
 - (ii) from a non- Pennatulacean Anthozoan species.
- 17. (Original) The fragment according to Claim 16, wherein said non-bioluminescent Cnidarian species is an Anthozoan species.
- 18. (Currently Amended) An isolated nucleic acid or mimetic thereof that hybridizes under stringent conditions to a nucleic acid selected from the group consisting of:
- (a) a nucleic acid encoding a chromo- or fluorescent protein from a non-bioluminescent Cnidarian species;
- (b) a nucleic acid encoding an Anthozoan chromo- or fluorescent protein from a non-Pennatulacean Anthozoan species;
- (c) a nucleic acid having a sequence of residues that is substantially the same as or identical to a nucleotide sequence of at least 10 residues in length of SEQ ID NOS:01, 03, 05, 07, 09, No:11, 13, 15, 17;
- (d) a nucleic acid that encodes a mutant protein of an Anthozoan chromo and/or fluorescent protein that is either:
 - (i) from a non-bioluminescent Cnidarian species; or
 - (ii) from a non- Pennatulacean Anthozoan species; and
- (e) fragments of the above sequences; or its complementary sequence.
- 19. (Original) The nucleic acid according to Claim 18, wherein said non-

USSN: 10/006,922

bioluminescent Cnidarian species is an Anthozoan species.

- A construct comprising a vector and a nucleic acid (Currently Amended) 20. selected from the group consisting of:
- a nucleic acid encoding a chromo- or fluorescent protein from a non-(a) bioluminescent Cnidarian species;
- a nucleic acid encoding an Anthozoan chromo- or fluorescent protein from a non-(b) Pennatulacean Anthozoan species;
- a nucleic acid having a sequence of residues that is substantially the same as or identical to a nucleotide sequence of at least 10 residues in length of SEQ ID NOS:01, 03, 05, 07, 09, <u>No:</u>11, 13, 15, 17;
- a nucleic acid that encodes a mutant protein of a chromo and/or fluorescent (d) protein that is either:
 - from a non-bioluminescent Cnidarian species; or (i)
 - from a non-Pennatulacean Anthozoan species; (ii)
- a fragment of the above nucleic acids; and
- a nucleic acid or the complement thereof that hybridizes under stringent (e) **(f)** conditions to the above nucleic acids.
- The construct according to Claim 20, wherein said non-(Original) 21. bioluminescent Cnidarian species is an Anthozoan species.
- (Previously Presented) An expression cassette comprising: 22.
 - a transcriptional initiation region functional in an expression host;
- a nucleic acid selected from the group consisting of the nucleic acids (a) (b) according to Claim 1; and
 - a transcriptional termination region functional in said expression host. (c)
- A cell, or the progeny thereof, comprising an expression cassette according to Claim 22 as part of an extrachromosomal element or integrated into the (Original) genome of a host cell as a result of introduction of said expression cassette into said

USSN: 10/006,922

host cell.

Claims 24-25 (Canceled)

- 26. (Withdrawn) An antibody binding specifically to a protein according to Claim 25.
- 27. (Previously Presented) A transgenic cell or the progeny thereof comprising a transgene selected from the group consisting of a nucleic acids according to Claim 1.
- 28. (Withdrawn) (Previously Presented) A transgenic organism capable comprising a transgene selected from the group consisting of a nucleic acids according to Claim 1.

Claim 29. (Canceled)

- 30. (Withdrawn) In an application that employs a nucleic acid encoding a chromo- or fluorescent protein, the improvement comprising:

 employing a nucleic acid according to Claim 1.
- 31. (Previously Presented) A kit comprising a nucleic acid according to Claim 1 and instructions for using said nucleic acid.
